The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and the allied sciences received in the National Agricultural Library. Magnetic tapes supplied by the library are computer processed, using several vocabulary control mechanisms. The resulting subject and author indexes provide access to the literature in considerably less time than would be required by traditional indexing techniques.

INTRODUCTION

The *Bibliography of Agriculture* is a monthly index to the literature of agriculture and allied sciences, based upon the indexing records prepared by the U.S. National Agricultural Library, for its CAIN (Cataloging and Indexing) computer system. Macmillan Information, a division of the Macmillan Publishing Company, Inc. prepares and publishes the Bibliography under the control of its own computer indexing system.

CONTENT

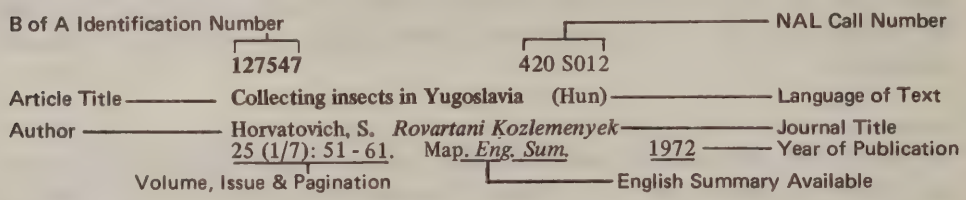
The National Agricultural Library collects literature related to agriculture from world wide sources. Publications are considered for inclusion in the CAIN System if a summary, abstract or title is available in a language in which the Library has expertise. The Bibliography includes journal articles, pamphlets, government documents, special reports, proceedings, etc. Books, new serials and other materials recently cataloged by the Library are announced in the *National Agricultural Library Catalog* published by Rowman and Littlefield.

Articles of substantial interest to the agricultural community are selected by specialists on the library staff. Editorials, letters to the editor, regular columns, and articles signed with pseudonyms or initials are not included. Indexing of articles on the processing of agricultural products is limited to those on primary processing. Generally material must have been published in the current year or the preceding year, but exceptions are made for comprehensive volumes or works of special significance to a wide audience.

The Bibliography is now divided into five sections: A main entry section, a subject index, a geographic index, a corporate author index, and a personal author index.

MAIN ENTRY SECTION

The main entry section provides full bibliographic data for the records added to the CAIN system during the preceding month by the National Agricultural Library.



Entries are assigned to one (or more if appropriate) of the broad subject categories shown in the table of contents. The array of subject categories was increased in 1972 to facilitate browsing through a small number of citations of high relevance to a particular interest. Approximately equal numbers of citations will fall into each category over a given period of time. In assigning materials to the categories, first consideration is given to the aspect, discipline or methodology involved, so that the categories will enhance information given in the title.

Within each category, entries are arranged alphabetically by journal title abbreviation. This permits rapid locating and scanning of articles from journals which are known to be relevant.

Each entry begins with a six digit identification number assigned sequentially throughout a volume year. This number serves as an identfier for the item in the various indexes. The call number of the National Agricultural Library is also noted on the first line of each entry, and should be included in any correspondence with the library. All titles are in English, using the Library's translations of non-English titles as necessary. If the text is other than English, the original language is indicated in parentheses following the title, using the following notations:

(Afr)	Afrikaans	(Fle)	Flemish	(Lit)	Lithuanian
(Alb)	Albanian	(Fre)	French	(Mac)	Macedonian
(Arm)	Armenian	(Geo)	Georgian	(Nor)	Norwegian
(Aze)	Azerbaijani	(Ger)	German	(Pol)	Polish
(Bel)	Belorussian	(Gre)	Greek	(Por)	Portuguese
(Bul)	Bulgarian	(Heb)	Hebrew	(Rum)	Rumanian
(Bur)	Burmese	(Hun)	Hungarian	(Rus)	Russian
(Chi)	Chinese	(Ice)	Icelandic	(Ser)	Serbian
(Cro)	Croatian	(Ind)	Indonesian	(Slo)	Slovak
(Cze)	Czech	(Ita)	Italian	(Slv)	Slovenian
(Dan)	Danish	(Jap)	Japanese	(Spa)	Spanish
(Dut)	Dutch	(Kor)	Korean	(Swe)	Swedish
(Est)	Estonian	(Lat)	Latin	(Tha)	Thai
(Fin)	Finnish	(Lav)	Latvian	(Tur)	Turkish
				(Ukr)	Ukrainian

In order to identify bibliographic elements within each main entry, note the following:

SUBJECT INDEX

The vocabulary of the Bibliography of Agriculture is derived from the indexed literature. As a result, it reflects both natural language and scientific terminology. The reader must keep this fact in mind and approach the subject index without any preconceived taxonomy in mind. For example, data on a particular member of the ACARIDAE family may be found under TICKS as well. Prevention measures will be found under ACARICIDE.

The reader should plan his search in terms of the most specific natural language term prior to searching under a scientific term. However, note that the vocabulary is an open ended one and new terms are added each month. Undoubtedly readers will be more keenly aware of crucial search terms within their own fields of research. If such terms are missing, we hope readers will notify the editor of such gaps. The Subject Index will increase its utility if there is frequent interaction between the research community and the editor.

All entries are based on single words in the title (and title enrichment when added by the library). An entry will be made whenever a title word matches a word on the authority file, which currently contains over 25,000 terms. The file is organized so that in most cases synonymous terms are grouped together under a single subject heading. Thus singular and plural forms are grouped under a single term as are grammatical variants:

PROTEINS (singular and plural variation)
I. Water, fats, ash & salt. II **Protein**
Modifying **proteins** for maximum utilization

MANAGEMENT (grammatical and term variation)
profits through nutrition and **management**
Management agricultural extension
* **Administration** of agricultural cooperatives
Techniques of **administering** apiaries in apiculture

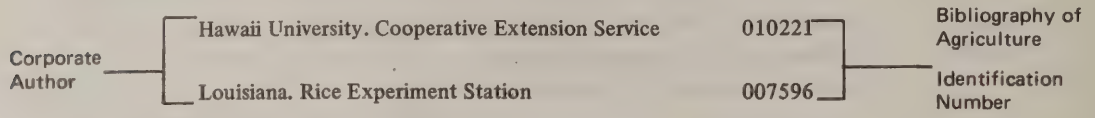
* Cross references are made to synonymous terms.

The title word on which the entry is based, appears in bold face type to facilitate rapid scanning of the index. A secondary word, which may either precede or follow the primary word, also appears in bold face type. These word pairs help provide finer access to desired term, particularly under headings which have many entries.

VIRUSES
Physical properties of blue-green **algal virus**
Venezuelan equine **encephalomyelitis virus**
Limited proteolysis of **potato virus X** by
with sugar beet tolerance to **virus yellows.**

If a search is required which related to a general term such as an ACID it would be preferable to search under the specific type of ACID. Very often a specific acid has already been established as a subject term. However new types of acids, or viruses or plant varieties will not have been identified in the the thesaurus and under such circumstances, searching under the more general term would prove more fruitful.

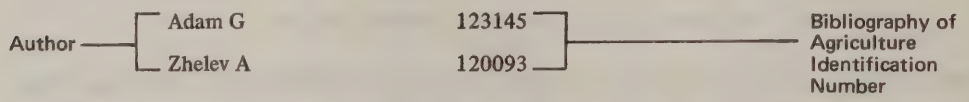
We have changed the format of the table of contents to reflect the identification number ranges of each of the main entry categories. Thus, the reader can check the category under which a subject entry falls, prior to verifying it in the main entry section.



The asterisk line: * * * * * *
Occasionally the reader will encounter a series of asterisks in place of title data under a term, followed by the B of A identification number. This line indicates the presence of material which is part of a series and the title data is identical to that immediately above the asterisk. The identification number given is the last entry in the series which has been entered consecutively within a particular category.

GEOGRAPHIC INDEX

As part of our goal of constantly increasing access to the literature, we have added a geographic index. This index is a direct alphabetic listing of all place names which have been indexed in association with the title. Obviously not all titles will have geographic entries. The indexing division of the National Agricultural Library will add geographic descriptors wherever it is germane to the subject of the article.



CORPORATE AUTHOR INDEX

Readers will note that the corporate author index is considerably enlarged. We are now able to indicate authorship of the publications of the State Agricultural Experiment Stations and Extension Services. The full corporate citation is given, followed by the six digit identification number referring to its appropriate main entry.

AUTHOR INDEX

All personal authors (to a maximum of ten for each citation) are included in the index. Entries are made by last name and initials, followed by the six digit identification number referring to the bibliographic data in the main entry section.

AVAILABILITY OF REFERENCES CITED

Most of the current publications of the Department of Agriculture, and publications issued by the State Experiment Stations and the State Agricultural Extension Services, may be obtained free of charge by applying directly to the issuing agency. The National Agricultural Library does not distribute them, nor does the publisher.

Users who wish to obtain full text for citations should first utilize the resources of their local libraries. For material which is not readily available from other sources, users may request material from the National Agricultural Library. Such requests must include the complete citation as well as the Library's call number. Microfilm or electrostatic copies of documents may be purchased from the Photocopying Service of the National Agricultural Library, U.S. Department of Agriculture, Beltsville, Maryland 20705. Copy charges are:

Microfilms:	$1.00 for each 30 pages or fraction copied from a single article or book
Electrostatic Copies:	$1.00 for each 10 pages or fraction copied from a single article or book.

Payment must accompany the order. Cash, library coupons, check, or money order drawn to the National Agricultural Library, USDA, are acceptable. Payment for orders originating outside the United States should be made by international money order or draft on an American bank, or by UNESCO book coupons. Library coupons, valued at $1.00 each, may be purchased in any quantity from the Library's Photocopying Service.

086883 450 C16
Inheritance of photoperiodic heading response in winter & spring cultivars of bread wheat. Keim, D L *Can J Plant Sci* 53 (2): 247-250. Apr 1973

086884 450 C16
Importance of seed source in preliminary evaluations of doubled haploids in barley. [Breeding]. Walsh, E J *Can J Plant Sci* 53 (2): 257-260. Apr 1973

086885 QH607.A1C4
Ribosomal-RNA genes in euploids & aneuploids of hyacinth. [Hyacinthus orientalis]. Timmis, J N *Cell Differ* 1 (5/6): 335-339. Ref. Dec 1972

086886 442.8 C46
Selective chromosomal elimation during haploid formation in barley following interspecific hybridization. Subrahmayam, N C *Chromosoma* 42 (2): 111-125. Ref. 1973

086887 442.8 C46
A procedure for localizing genetic factors controlling mitotic nondisjunction in B chromosome of maize. Carlson, W R *Chromosoma* 42 (2): 127-136. Ref. 1973

086888 72.8 EM7
Selection for fibre characters in upland cotton. Innes, M L *Cotton Growing Rev* 50 (2): 101-105. Ref. Apr 1973

086889 64.8 C883
Progeny testing for forage yield in tall fescue, Festuca arundinacea, Schreb. Frakes, R V *Crop Sci* 13 (3): 293-295. May/June 1973

086890 64.8 C883
Cross-fertilization of alfalfa as affected by genetic markers, planting methods, locations, & pollinator species. Kehr, W R *Crop Sci* 13 (3): 296-298. Ref. May/June 1973

086891 64.8 C883
Meiosis & pollen viability in hexaploid Triticale. Sapre, V T *Crop Sci* 13 (3): 301-302. Ref. May/June 1973

086892 64.8 C883
Yield, yield component & fiber property variation of cotton (Gossypium hirsutum L.) within & among environments. Meredith, W R *Crop Sci* 13 (3): 307-312. Ref. May/June 1973

086893 64.8 C883
Combining ability and gene action estimates in an eight parent diallel cross of sugarbeet. Smith, G A *Crop Sci* 13 (3): 312-316. Ref. May/June 1973

086894 64.8 C883
Chromosomal location of male fertility restoring genes in six lines of common wheat. Bahl, P N *Crop Sci* 13 (3): 317-320. Ref. May/June 1973

086895 64.8 C883
Genetic studies of induced mutants in Melilotus alba. III. Folded leaflet, elongated stem, & short-petiole dwarf. Ronnenkamp, R R *Crop Sci* 13 (3): 320-321. Ref. May/June 1973

086896 64.8 C883
Inheritance of a new brachyism in corn, zea mays L. Legg, J G *Crop Sci* 13 (3): 322-324. Ref. May/June 1973

086897 64.8 C883
Single height-gene effects in doubled haploid Sorghum bicolor (L.) Moench as influenced by stand density. Schertz, K F *Crop Sci* 13 (3): 324-326. Ref. May/June 1973

086898 64.8 C883
Changes in quantitative traits associated with inbreeding in a synthetic variety of maize. Hallauer, A R *Crop Sci* 13 (3): 327-330. Ref. May/June 1973

086899 64.8 C883
Monogenic chlorotic-lesion resistance in corn to Helminthosporium maydis. Smith, D R *Crop Sci* 13 (3): 330-331. May/June 1973

086900 64.8 C883
Relationship to stomatal length & frequency & pollen-grain diameter to ploidy level in Bromus inermis Leyss. Tan, G Y *Crop Sci* 13 (3): 332-334. Ref. May/June 1973

086901 64.8 C883
Inheritance of semidwarfness in several wheat crosses. Romero, G E *Crop Sci* 13 (3): 334-337. Ref. May/June 1973

086902 64.8 C883
Analysis of several types of gene action controlling resistance to bacterial blight of cotton by means of a generalized computer model. [Xanthomonas]. Davis, D D *Crop Sci* 13 (3): 338-343. Ref. May/June 1973

086903 64.8 C883
Nitrate reductase activity in corn leaves as related to yields of grain & grain protein. Deckard, E L *Crop Sci* 13 (3): 343-350. Ref. May/June 1973

086904 64.8 C883
Relationship between F2 & selected F3 progenies in cotton (Gossypium birsutum L.). Meredith, W R *Crop Sci* 13 (3): 354-356. May/June 1973

086905 64.8 C883
Performance of crosses within & between two diverse sources of birdsfoot trefoil, Lotus corniculatus L. Conje, A M *Crop Sci* 13 (3): 357-360. Ref. May/June 1973

086906 64.8 C883
Seedling vigor of open-pollination progenies of intraand intersource crosses of birdsfoot trefoil, Lotus corniculatus L. Conje, A M *Crop Sci* 13 (3): 361-362. Ref. May/June 1973

086907 64.8 C883
Bulk, pedigree, & early generation testing breeding methods compared in soybeans. Luedders, V D *Crop Sci* 13 (3): 363-364. Ref. May/June 1973

086908 64.8 C883
Protein distribution in oat (Avena sterilis L.) Kernel. Youngs, V L *Crop Sci* 13 (3): 365-367. May/June 1973

086909 64.8 C883
Meiotic irregularities in hybrids between diverse genotypes of tall fescue (Festuca arundinacea, Schreb.). Evans, G M *Crop Sci* 13 (3): 376-379. Ref. May/June 1973

086910 64.8 C883
Genetic analysis of Crumpled mutant in cotton, Gossypium hirsutum L. Kohel, R J *Crop Sci* 13 (3): 384-386. May/June 1973

086911 64.8 C883
Relation of genes from Hope & Red Egyptian wheat for reaction to stem rust. [Puccinia graminis]. Williams, N D *Crop Sci* 13 (3): 388-389. Ref. May/June 1973

086912 64.8 C883
A yield-related measure of earliness for cotton, Gossypium hirsutum L. Bilbro, J D *Crop Sci* 13 (3): 392-393. May/June 1973

086913 64.8 C883
Interaction of two basic color factor genes in alfalfa. Bingham, E T *Crop Sci* 13 (3): 393-394. May/June 1973

086914 64.8 C883
Hexaploid cotton: some fiber & spinning properties. Muramoto, H *Crop Sci* 13 (3): 396-397. May/June 1973

086915 475 SCI23
Mutagenic action of nitroso methyl urea in pearl millet. Mohan, S T *Cur Sci* 42 (13): 474-475. July 1973

086916 104 D41A
Breeding for pH [hydrogen-ion concentration] tolerance in barley. Stolen, O *Denmark Vet-landbohojsk Arsskr* 226: 1-13. 1973

086917 24 EA74
Plant hairiness in Allen cotton (Gossypium hirsutum). [Breeding, Empoasca, host plant resistance]. Innes, N L *East Afr Agr Forest J* 38 (3): 298-307. Ref. Jan 1973

086918 105.8 G36E
